More HTTP response (status) codes

5xx — server error

By far the most common:

- 500 Server Error

This is what you'll tend to see if the server software crashed while trying to handle your request.

Things to maybe include somewhere

Browser "developer tools"

The network tab

Server setups more complex than 1 server:

- server + database

- server + API request to inner server

- servers as "cattle" — stateless, not precious

- the concept of "deployment"

- test/staging
